Certified Scrum Product Owner (CSPO) - Scrum Alliance, **Member** - Product Camp (Austin), AnitaB.org

EDUCATION

Northeastern University

Master of Science in Information Systems

Boston, MA

September 2023 - December 2024

WORK EXPERIENCE

QuadKor Inc.

Product Manager

Austin, TX

June 2025 - September 2025

- Managed end-to-end product lifecycle for 3 Manufacturing ERP modules; authored PRDs, user stories, acceptance criteria, and API integration specs, ensuring alignment across engineering, QA, and design teams
- Tracked sprints, handled backlog grooming, and streamlined parallel releases using Jira, improving efficiency
- Assisted with design input mockups using Figma for a mobile application, collaborated with UI/UX teams to translate requirements into intuitive interfaces, reducing client-requested changes
- Worked with the President and senior stakeholders to define product roadmaps, prioritize enhancements, and support planning for the release of 3 key features

Saayam For All

Product Manager

Austin, TX

February 2025 - Present

- Wrote user stories for feature planning and prioritization, supporting clarity across volunteer development efforts
- Collaborated with developers and testers to validate requirements and deliver 2 core MVP features within tight release cycles

Tata Consultancy Services

Associate Product Manager (Business Analyst Focus)

Bangalore, KA

March 2021 - September 2023

- Defined requirements, led roadmapping, and coordinated with developers, QA, and product owners to deliver 6 features for a healthcare complaint management platform; used SQL queries, user feedback, and analytics to support data-driven decisions
- Gathered qualitative and quantitative feedback from 250 users, created PRDs, and utilized data-driven decision-making to enhance workflows and end-to-end user experience, driving a 10% increase in user engagement and meeting key KPIs for operational efficiency
- Applied agile methodologies to prioritize 50+ tasks, manage feature execution, and conduct impact assessments, ensuring timely delivery and optimal product performance
- Addressed key usability and process bottlenecks by spearheading A/B testing and user journey evaluations, applying data analytics to optimize 5 crucial product features, and coordinating User Acceptance Testing (UAT), thereby significantly reducing feature launch time and enhancing system reliability
- Awarded 'On the Spot Award' 3 times for ideating, building, and delivering an automated report tool, reducing turnaround time from 2 days to seconds, while mentoring and onboarding new team members

Simplified Future Systems

Front-End Developer Intern

Belgaum, KA

July 2019 - August 2019

- Developed a full-stack online bookstore using React, MySQL, and REST APIs; optimized front-end performance and navigation flow, cutting page load time by 15% and user steps by half

PROJECTS

ParentingSync - AI-Powered Parenting Insights

- Built a GenAI-powered insights tool using Python, NLP (VADER Sentiment), Reddit API, REST APIs, and web scraping to analyze 25 discussions per query; improved usability through iterative UX testing and metric tracking

Nearly - Accommodation Hunt Web Application

- Evaluated user needs from 55 participants to inform feature prioritization and UX refinement; implemented REST APIs and synchronized the front-end (React, Tailwind CSS, MongoDB, Typescript) with SQL and back-end components, ensuring seamless data flow and tracking metrics
