PROFESSIONAL SUMMARY

Product Manager and Technical Business Analyst with 4+ years of experience driving **customer-focused** product initiatives, **project management**, **AI workflows**, and cross-functional delivery across business applications, internal platforms, and digital products. Known for turning ambiguous stakeholder needs into clear requirements, workflows, and release-ready solutions.

SKILLS AND CERTIFICATIONS

Product Management & Ownership: Product lifecycle management, product roadmapping, acceptance criteria, backlog prioritization, sprint planning, release planning, MVP scope

Business Analysis & Delivery: BRDs, requirements gathering, stakeholder interviews, workflow mapping, gap analysis, impact analysis, UAT coordination

Technical & API Skills: SQL, REST APIs, JSON, API requirements and testing, Python, AWS

Analytics, AI & Automation: Dashboards, KPI tracking, user feedback analysis, A/B testing, Tableau, Power BI, Google Analytics, AI workflow automation, Pivot Tables, VLOOKUP, GenAI, prompt-based workflows

Tools & Certification: Jira, Confluence, Figma, Excel, Certified Scrum Product Owner (CSPO), Scrum Alliance

WORK EXPERIENCE

QuadKor Inc.

Austin, TX

Product Manager

June 2025 - September 2025

- Owned requirements and delivery support for **3 manufacturing ERP modules**, translating stakeholder needs into PRDs, user stories, acceptance criteria, process flows, and API integration specifications for engineering, QA, and UX teams.
- Prioritized and refined backlog items across 3 key feature releases, clarifying sprint scope and tracking release progress in Jira to improve alignment across engineering, QA, design, and business stakeholders.
- Converted client change requests into **Figma-supported mobile workflow** updates, helping UX and engineering define development-ready screens, edge cases, and acceptance criteria while reducing requirement ambiguity before development.
- Supported QA and UAT by clarifying expected behavior, reviewing defects, and validating delivered features against documented requirements across ERP workflows.

Saayam For All

Austin, TX

Product Owner

February 2025 - Present

- Defined MVP requirements, user stories, and acceptance criteria to support feature planning and prioritization across volunteer development teams.
- Applied **GenAI tools** to synthesize stakeholder inputs and streamline requirement documentation across 2 core MVP features, improving clarity across user stories, API specifications, and UAT scenarios.
- Collaborated with developers and testers to validate requirements and deliver 2 core MVP features within tight release cycles.

Tata Consultancy Services

Bangalore, IN

Associate Product Manager

March 2021 - September 2023

- Served in a **Business Analyst-focused Product Manager** role, defining business and functional requirements, workflows, and acceptance criteria for a **Healthcare** CRM complaint management platform, supporting delivery of 6 product features.
- Gathered and analyzed feedback from 250 users and customer support channels, using SQL queries, dashboards, and stakeholder input to identify workflow gaps and recommend product improvements that increased user engagement by 10%.
- Created PRDs, BRDs, process flows, and UAT scenarios to align engineering, QA, product owners, and business stakeholders on scope, edge cases, and success criteria.
- Prioritized 50+ backlog items, supported sprint planning, coordinated UAT, and tracked feature readiness to improve release predictability across Agile delivery cycles.
- Conducted usability reviews, A/B testing, and user journey analysis for 5 workflow enhancements, reducing user friction across complaint management processes.
- Built an automated reporting workflow using product data and analytics, reducing turnaround time from 2 days to seconds; received 3 On-the-Spot Awards for ownership, delivery, and team contribution.

PROJECTS

ParentingSync - AI-Powered Parenting Insights

- Built a **GenAI-powered research and automation tool** using Python, Reddit API, REST APIs, NLP sentiment analysis, and web scraping to analyze 25+ parenting discussions per query.

Nearly - Accommodation Hunt Web Application

- Evaluated user needs from **55 participants**, prototyped **AI-assisted discovery flows**, and synchronized front-end, SQL, and back-end components for accommodation search, filtering, comparison, and preference-based recommendations.

EDUCATION

Northeastern University

Boston, MA

Master of Science in Information Systems

September 2023 - December 2024

Visvesvaraya Technological University

Bangalore, IN

Bachelor of Engineering in Computer Science

July 2016 - August 2020
